WOLVERINE
RESOURCES CORP.
OTCPK: WOLV

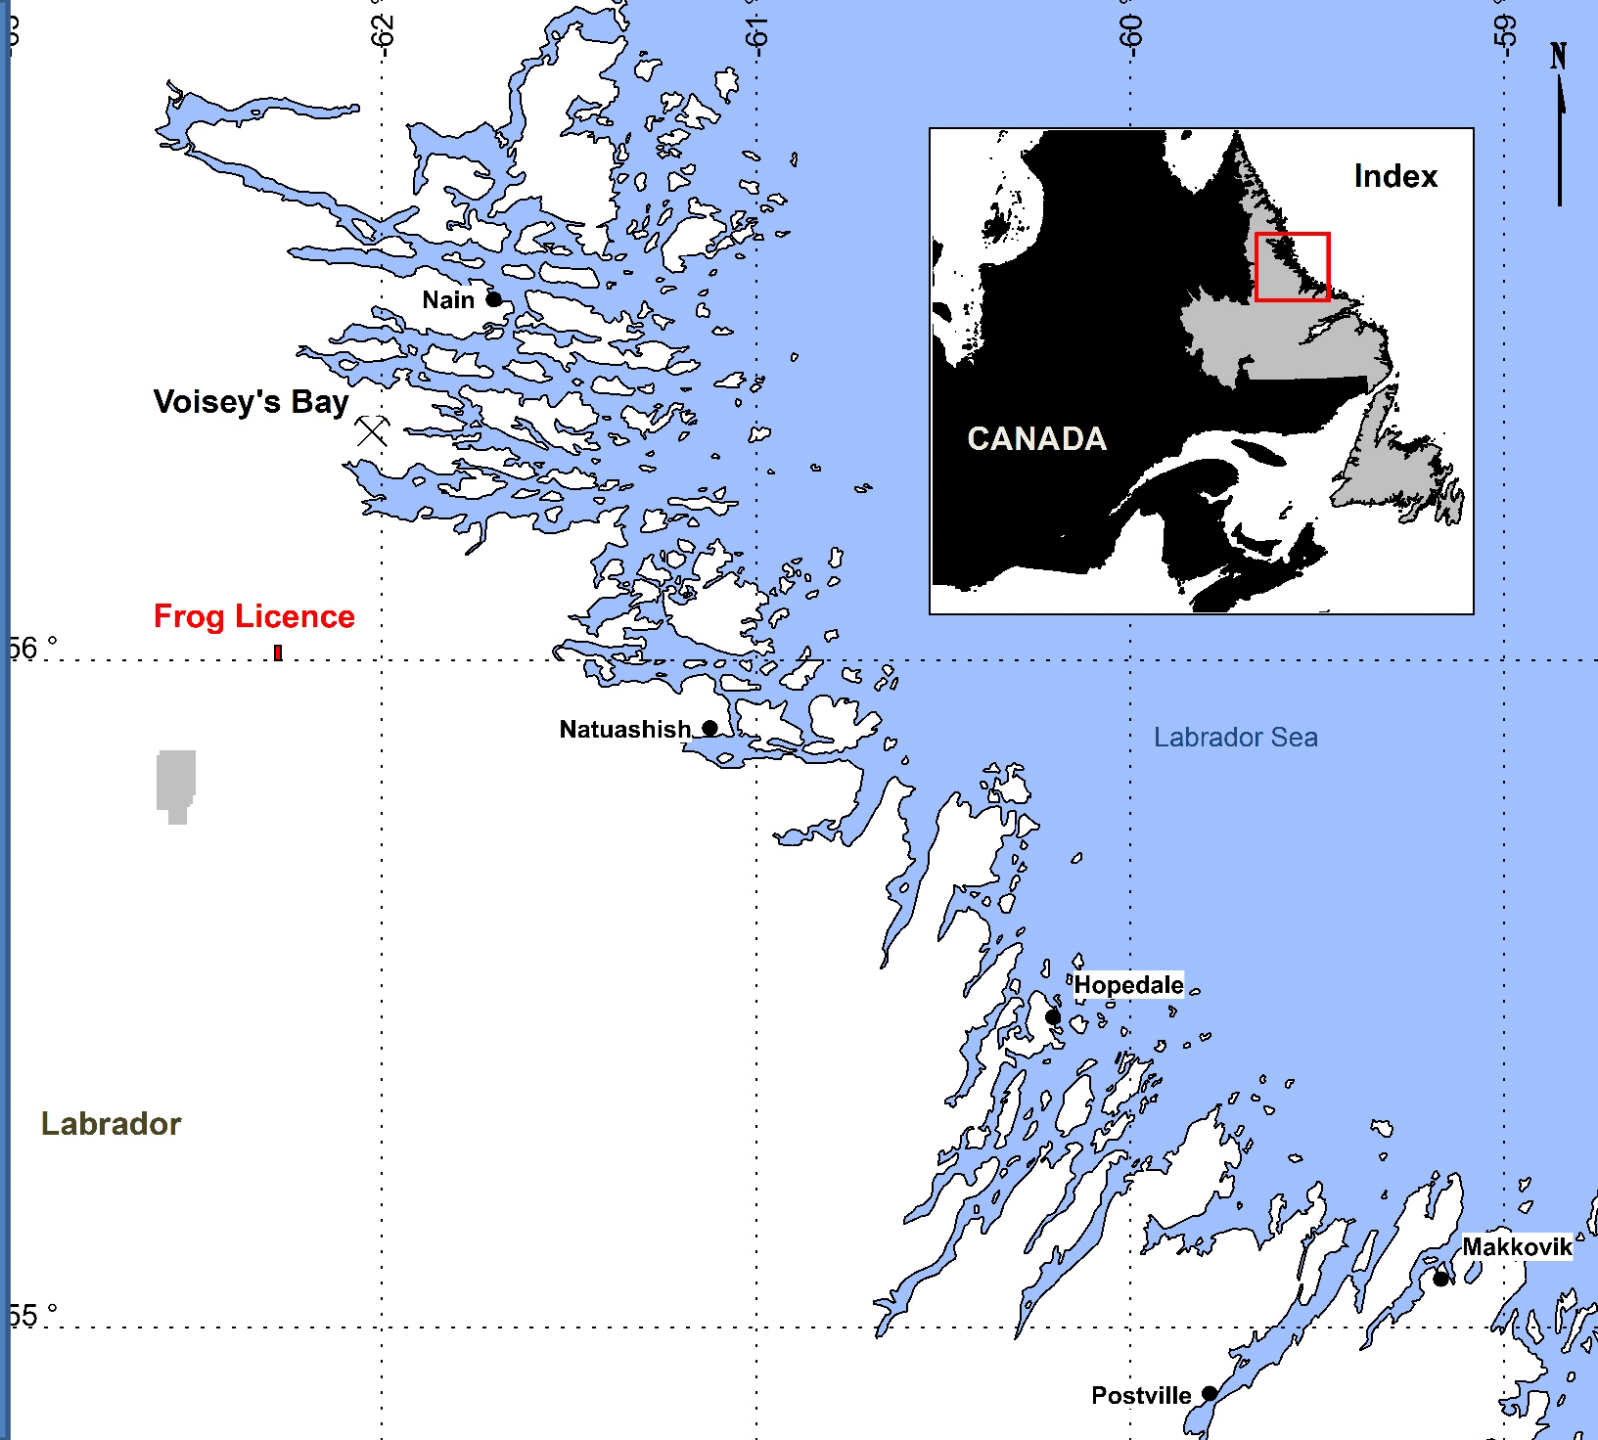

Wolverine Resources Corp. ("Wolverine") is a junior exploration company focused on the exploration of mineral properties in Labrador, Canada. Wolverine currently holds interest in 3 early stage mineral properties in Labrador.

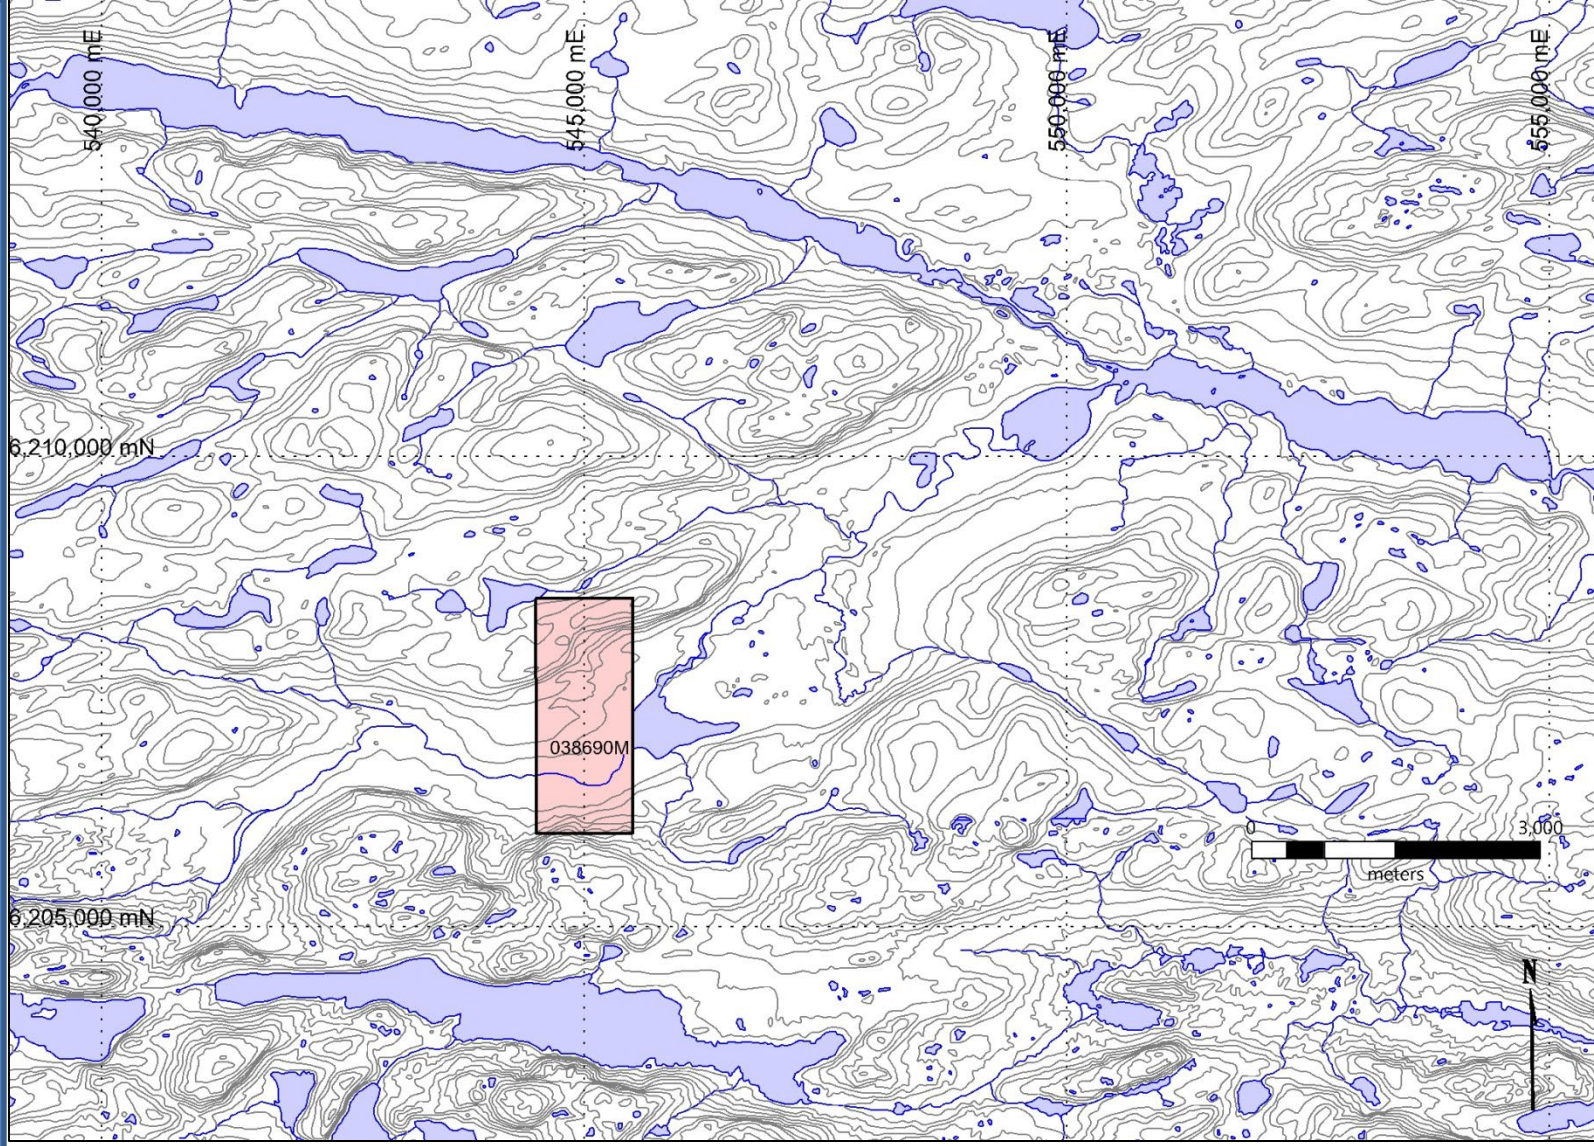

Frog Property

Labrador – Property Location

Property Licences

1 Licence (250ha) – 60% owned by Rich Resources Inc.

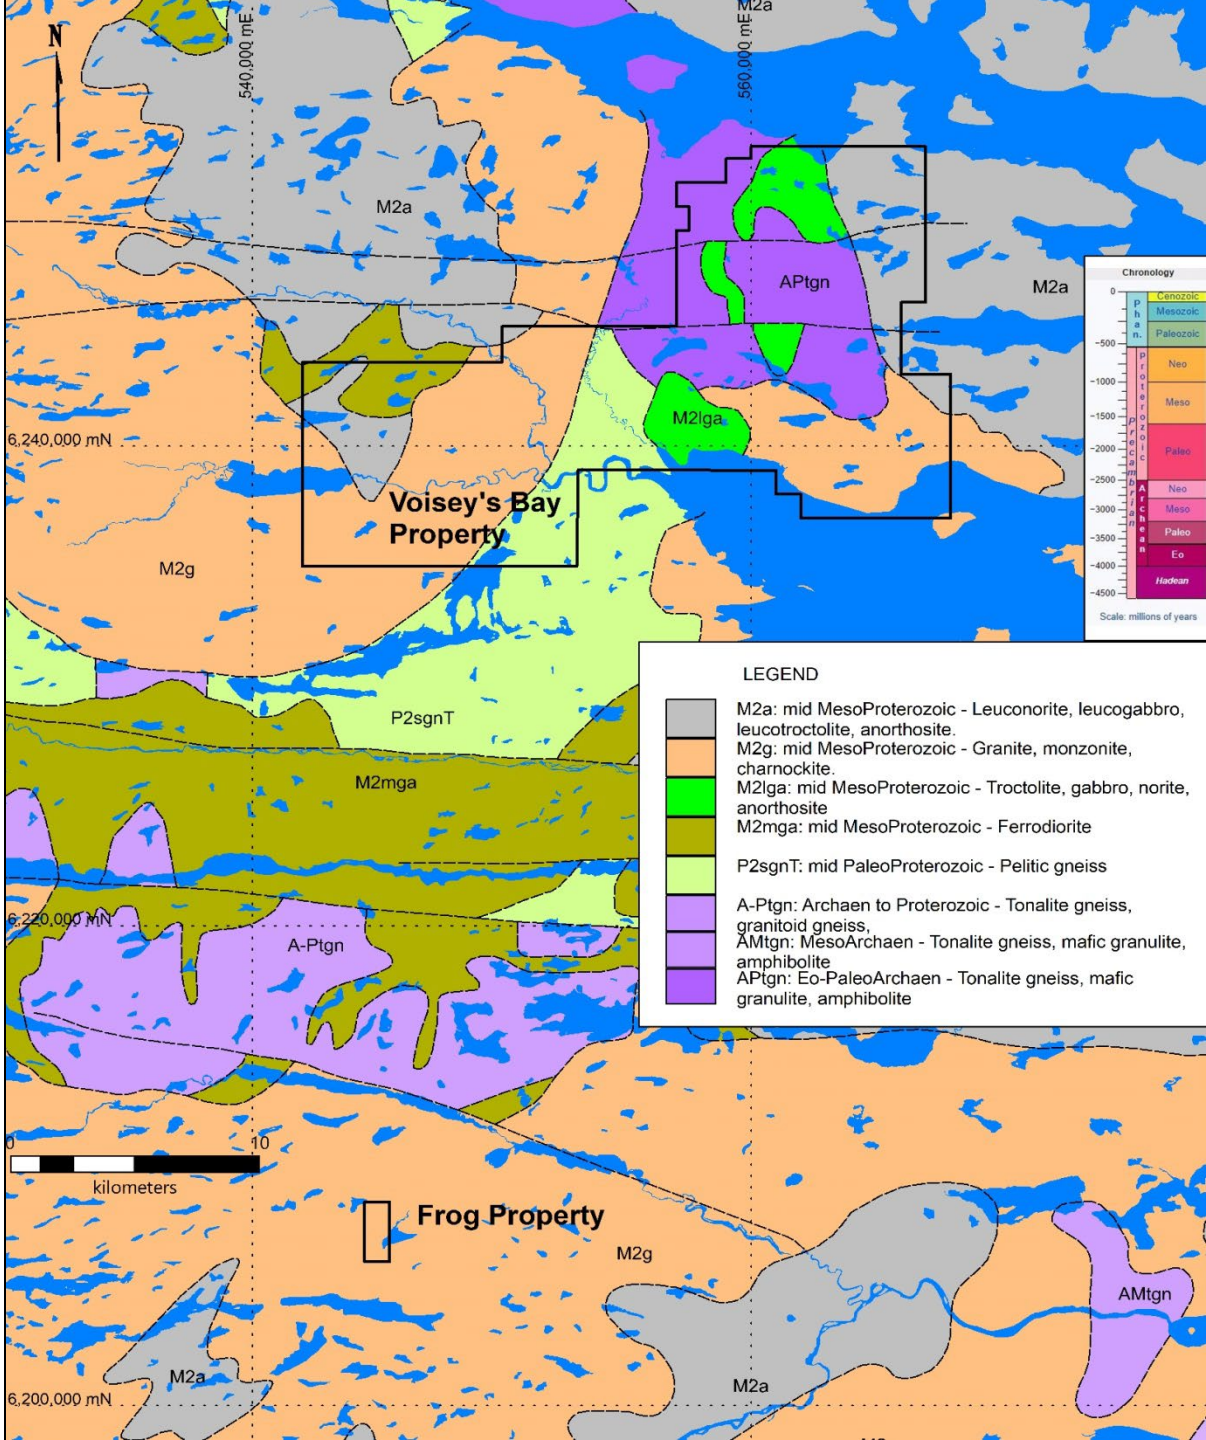

40% interest acquired by Wolverine in 2022

Property acquired in 2020+2021

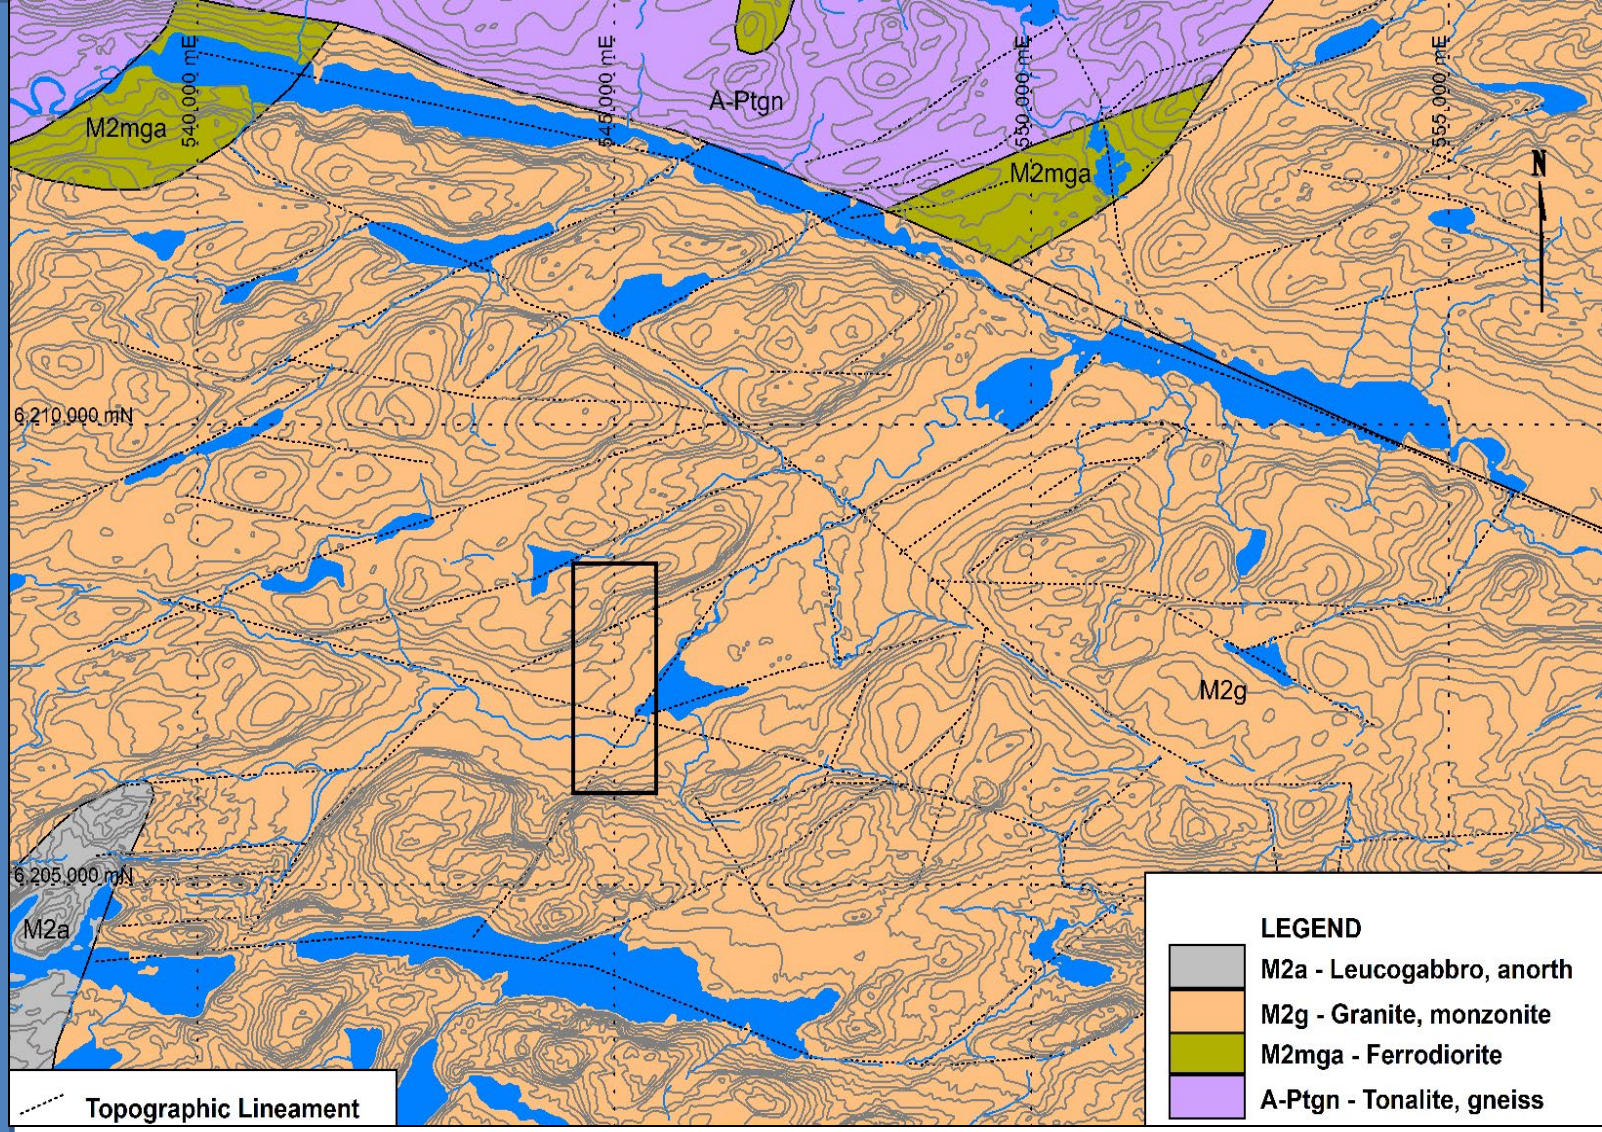

Float plane and snowmobile accessible

Regional Geology

Property in a similar geological setting as Voisey's Bay Mine.

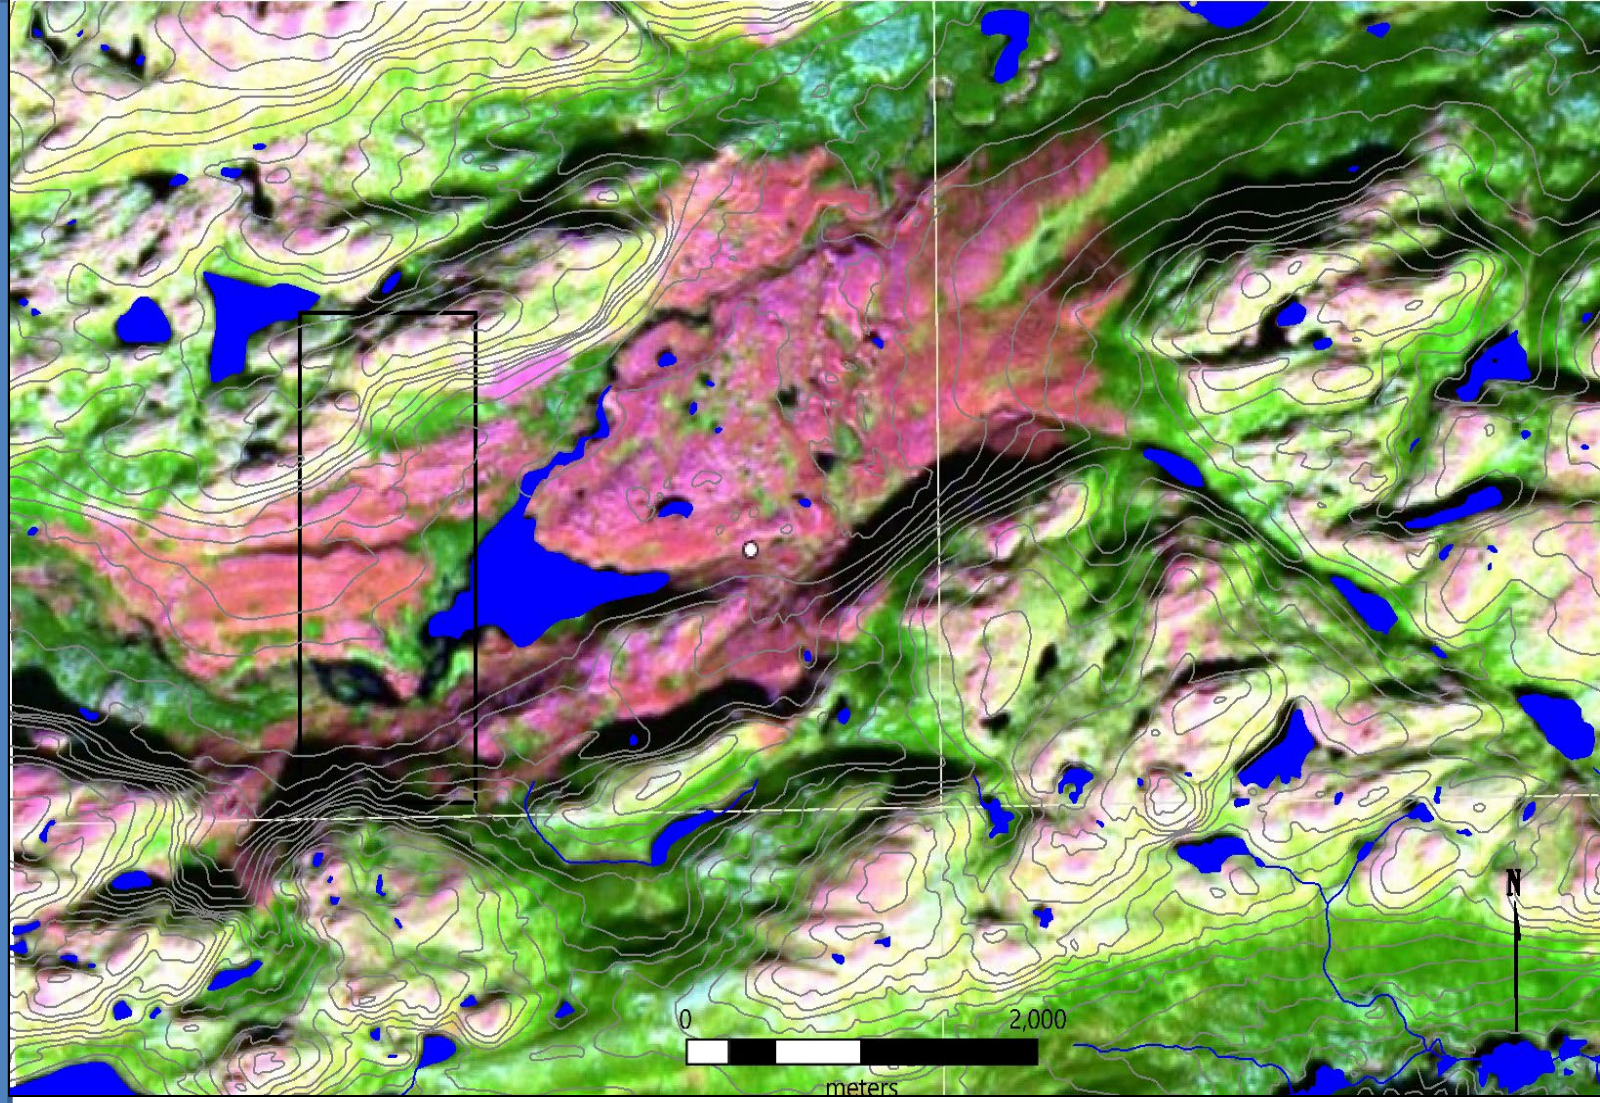

Geology

Property underlain by Churchill Province Granites

Landsat 8 Imagery

Property encompasses Fe-rich surface exposures.
This anomaly initially drew interest to the area.

Rock Sampling

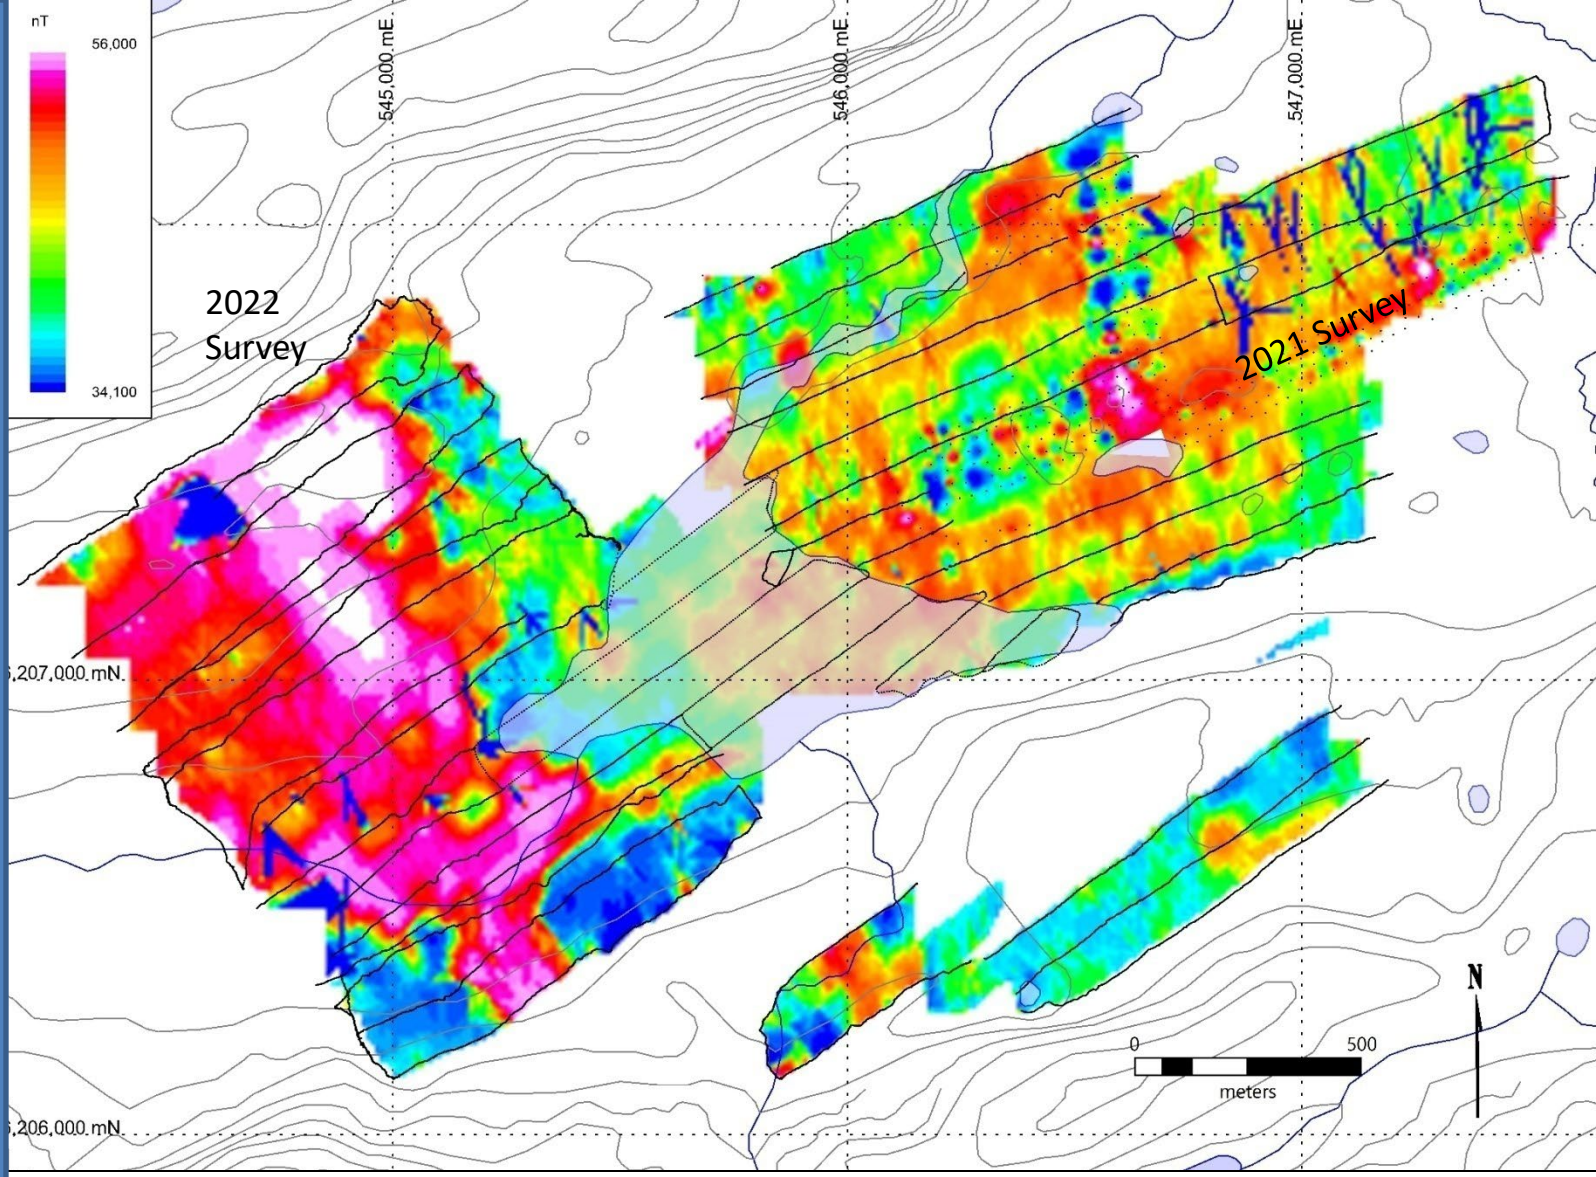

During a property visit on the adjoining Frog property by geologists J. Peters and D. Corrigan, PhD, in 2022, rocks containing Fayalite-olivine granites resembling Kiruna-type magnetite-apatite mineral deposits (often referred to as IOCG) were found.

These types of deposits vary, often containing significant amounts of Cu, Au, +/- U, with moderate amounts of REEs such as Olympic Dam, Australia or composed mainly of magnetite and apatite with enrichment in REEs and lacking Cu or Au (Lyon Mt, NY).
